

1. Inverted sew the top line of both tail pieces together.
2. Leaving a gap, inverted sew the bottom curve of both tail pieces together.
Uninvert the tail through either gap so that the outside is out.
3. Inverted sew the top and bottom edges of the left wing together.
Uninvert the wing.
4. Inverted sew the top and bottom edges of the right wing together.
Uninvert the wing.
5. Working from the beak towards the body, inverted sew one side of the body to the top of the body.
As you approach the main body, sew the top of the body to the top of the wing.
6. Sew the side of the body to the bottom of the wing, then reconnect to the top of the body.
7. Repeat step 5 for the other side of the body.
8. Repeat step 6 for the other side of the body.
9. Inverted sew the side of the body's bottom half to the bottom of the body.
10. Repeat step 9 for the other side of the body.
11. Keeping the body inverted, attach the tail.
Uninvert the body through the unsewn back tip of the body.

You're nearly there!
